The screenshot displays a web design tool interface. At the top right, there is a blue navigation bar with icons for a desktop and a mobile phone, and a large orange button labeled "PUBLISH". Below this, a secondary blue bar contains menu items: "HTML", "DESIGN", "PAGES", "STORE", and "SETTINGS".

The main content area is titled "Pages" and features an "Add Page +" button. A list of pages is shown, with "Welcome" selected and highlighted in blue. Other pages in the list include: "Get webinars", "Math", "ELA", "Science", "History/Social Studies", "ELA", "Special Needs", "Distance Resources", "Music", "Art", "Agriculture and Consumer Sci.", "Foreign Languages", "Personal Inquiry Creation", "IBB Resources", "Virtual Field Trips", "Study Apps", "Google", "Web Conferences Self", and "Home Link".

To the right of the page list is a configuration panel for the selected "Welcome" page. It includes a "Page Name" field containing "Welcome". Under "Page Layout:", there are four preview thumbnails: "Full Header", "Short Header", "No Header", and "Landing Page". Below these are two checkboxes: "Add page in navigation menu" (checked) and "Pinned under this page" (unchecked). An "Advanced Settings +" link is also present. At the bottom of the panel are three buttons: "Save & Edit" (highlighted in blue), "Copy Page", and "Delete Page".
